## Summary

Highly skilled Golang Developer with a proven track record of developing and implementing efficient APIs and applications, resulting in significant improvements in system performance and user satisfaction. Collaborative team player with expertise in database management, integration with external systems, and writing reliable code that reduces the number of bugs. Passionate about optimizing performance and delivering innovative solutions that drive business growth.

## Experience

### Back End Golang Developer

#### Iknite Space

Apr 2022 - Present (1 year 5 months)

- 1- Developed and maintained a Golang application for a large online ticket purchasing platform, resulting in a 10% increase in sales and a 15% increase in customer satisfaction scores.
- 2- Led the development and implementation of MicroService open with service - service communication through gRPC, GraphQL and Json Proxy, resulting in a 50% increase in system scalability and a 5% reduction in maintenance costs.
- 3- Debugged and Optimized a complex Golang applications, reducing the number of production issues by 40% and improving system reliability by 20%.
- 4- Wrote unit and integration tests for a Golang application using testify, Dockertest etc, improving overall code quality by 25% and reducing the number of bugs by 30%.
- 5- Developed and maintained multiple Go MicroServices for processing of payments, handling notifications with Aws SNS,SQS etc, which improve application reliability by 30%.
- 6- Collaborated in developing systems and deployment infrastructures (SQS, SNS, Cloud watch services, Route53 Hosted Zones, SES, ECR, ECS, RDS ) with AWS Cloud Formation, GitHub Actions CI/CD Pipelines, Docker containerization which streamlines developer experience and deploy time rate.
- 7- Managed 2 other developers and organized, added details and prioritized tickets before grooming meeting.

Skills: Application Programming Interfaces (API) · Amazon S3 · SQL · Unit Testing · Shell Scripting · Amazon ECS · Git · Continuous Integration and Continuous Delivery (CI/CD) · Amazon Relational Database Service (RDS) · Amazon Elastic Container Registry (ECR) · Amazon CloudWatch · AWS CloudFormation · gRPC · docker · golang · PostgreSQL · Amazon Web Services (AWS)

### Front End Software Engineer

#### Hourworth

May 2023 - Present (4 months)

- 1- Developed highly customizable UI components with Front End Technologies like ReactJS, Sass, JavaScript, Saas which improved overall web app branding and acceptance criteria by 100%
- 2- Documented Spike Research on Design Tickets, New Technologies which greatly improved developers experience, design choice, methodology and reduced efforts on getting a task done.
- 3- Rewrote HTML to meet industry and company standards for SEO and Accessibility.

4- Maintained graphic standards and branding throughout the product's interfaces.

Skills: Bootstrap · HTML5 · Cascading Style Sheets (CSS) · redux · Git · JavaScript · React.js, Jira

## Web Developer

### Upwork

Jan 2019 - Present (4 years 8 months)

- 1- Built and maintained websites using HTML, CSS, and JavaScript.
- 2- Developed responsive web designs that work on all screen sizes.
- 3- Integrated third-party APIs into websites.
- 4- Worked with clients to gather requirements and deliver projects on time and within budget.
- 5- Maintained a high level of customer satisfaction.

Skills: Bootstrap · HTML5 · Cascading Style Sheets (CSS) · GitHub · JavaScript

## Software Engineer - Co-Founder

### BCC Technologies LTD

Aug 2021 - Jan 2022 (6 months)

Bcc Technologies LTD was a tech startup co founded by me and 2 friends of mine during the eve of our graduation in school focused primarily to provide software solutions to solve the problem of excessive bureaucracy of paperwork at college institutions.

- 1- Managed 2 developers, 1 content creator and oversaw the development of user stories, wireframes and the development of E-R Models which helped to sync all the front-end and back-end developers on same page.
- 2- Participated in Agile development processes and Scrum meetings, resulting in a 20% increase in project completion rate and a reduction in project cost.

## Education

### HIBMAT University Institute of Buea.

Bachelor's degree, Computer Software Engineering

Oct 2020 - Dec 2021

Major in Software Development

### HIBMAT University Institute of Buea.

Higher national diploma, Computer Engineering

Oct 2018 - Aug 2021

## Licenses & Certifications

### Responsive Web Design - freeCodeCamp

## Skills

Go (Programming Language) • Microservices Architecture • RESTful API Design and Development • Collaboration and Teamwork • Containerization (e.g. Docker) • Continuous Learning and Improvement

- Empathy and Customer-Centric Mindset • Adaptability and Flexibility • Continuous Integration and Continuous Delivery (CI/CD) • Git

## Honors & Awards

### **Best Behaved Student** - HIBMAT University Institute of Buea- HUIB

Dec 2021

Most recognizable behaved student during my Bachelor's of Technology degree program, majoring in Software Development.
